

Ohio River Basin Fish Habitat Partnership (ORBFHP)

- ORSANCO was contacted by USFWS to act as pass-through for \$170,000 contract for 1 year study
- Project will provide a web-based decision support tool for Midwest US stakeholders
 - Built upon aquatic habitat assessment models
- ORSANCO will receive a small administrative fee (~\$6,500)

Decision Support Tools

1. Visualization

- a) Allows users to visualize current landscape conditions at any scale of interest

2. Ranking

- a) Allows users to rank watersheds of interest within a study area based on current landscape or response variable conditions

3. Futuring

- a) Allows users to estimate effects on a response variable of interest based on potential landscape modifications
