

Monthly Quality Update September 2025

**OHIO RIVER VALLEY
WATER SANITATION COMMISSION**

5735 Kellogg Avenue, Cincinnati, Ohio 45230

(513) 231-7719 Fax (513) 231-7761

Flows

Average flows at seven Ohio River locations are displayed below. At each location the September 2025 average flow (red bar) is contrasted with the long-term average monthly flow (blue bar). Flows were below average during the month of September.

Bacteria

The bacteria monitoring results from five of the six Ohio River locations in September are in the attached graphs. ORSANCO's water quality criteria for the protection of human health during the contact recreation season are:

- *E. coli* count is not to exceed 240 CFU/100mL in more than 25 percent of samples. (*E.coli* is shown with a red line on the graph.)
- *E. coli* shall not exceed 130 CFU/100mL as a 90-day geometric mean, based on not less than five samples per month.

ORSANCO's water quality criteria for the protection of public water supply year round are:

- Fecal Coliform shall not exceed 2,000/100mL as a monthly geometric mean based on not less than five samples per month.

Pittsburgh

In Pittsburgh, ORM 1.4 had one individual exceedance for *E.coli*. ORM 4.3 did not exceed the *E.coli* criteria.

Wheeling

In Wheeling, ORM 86.8 and ORM 92.8 did not exceed the *E.coli* criteria.

Huntington

In Huntington, ORM 305.1 did not exceed the *E.coli* criteria. ORM 314.8 had one individual exceedance for *E.coli*.

Cincinnati

In Cincinnati, ORM 462.6 and ORM 477.5 did not exceed the *E.coli* criteria. ORM 470.0 had one individual exceedance for *E.coli*.

Louisville

In Louisville, ORM 594.0 had one individual exceedance for *E.coli*. ORM 619.3 did not exceed the *E.coli* criteria.

Evansville

In Evansville, ORM 791.5 did not exceed the *E.coli* criteria. ORM 793.7 had one individual exceedance for *E.coli*.

Atrazine

Evansville drinking water utility samples the Ohio River at their intake and analyzes for atrazine by immunoassay technique. Results for September 2025 are presented below. Evansville had no criteria violations of the Maximum Contaminant Level (MCL) of 3.0 ug/L set by the Safe Drinking Water Act for finished drinking water.
